

# LED Lightbulb Replacement

1

Identify the lights that need to be replaced. Make sure the light blanket is turned off.

2

Cut wires on each side of the lights that you want replaced.

3

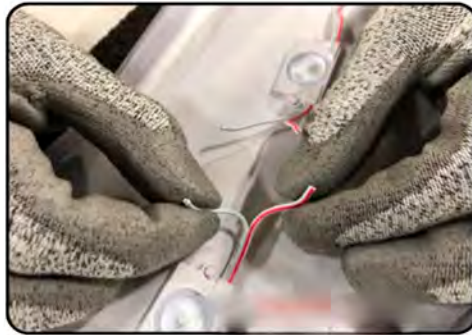

Pry off light while holding plastic pin on the back side of the fabric.

4

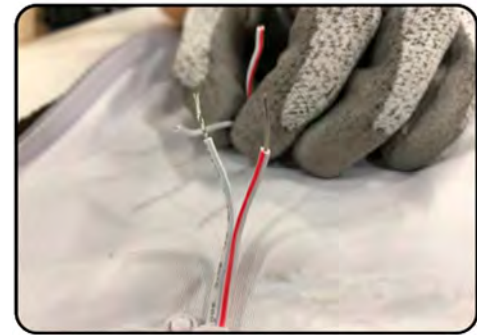

Snap on new light.

5

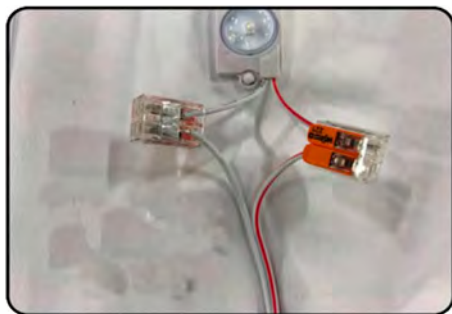

Split the wires so that they are separated.

6

Strip the wires exposing 0.5" of the metal on both sides.

7

Open clamps. Match red/red and white/white wires. Insert wires in connectors and close clamps.

8

Wrap connectors together in white electrical tape.
